

# Secure Cloud Hosting Services for Healthcare

*Are you looking for a hosting partner who understands your healthcare system? eMedApps provides state-of-the-art hosting with the unique business needs of healthcare organizations in mind.*

## Flexible

Your system set-up is unique. Your hosting partner should be able to accommodate your individual needs. eMedApps provides EHR application hosting services designed to fit your specific needs. We provide hosting services in our state-of-the-art data centers or manage the servers at your site. We can also host your non-EHR systems for you.

## Scalable

Your cloud hosting needs today might change tomorrow. Our hosting services are designed to grow with your practice and can accommodate your growth quickly to meet business demands.

## Secure

Our scalable, state-of-the-art data centers are HIPAA, SOC 2 Type II, and SOC 3 compliant and provide the security, connectivity, redundancy, and support you demand from your hosting partner.

## Continuous Data Access

Hosting environments need a backup plan in case of internet outage. Our hosting offering includes our CareFinity™ business continuity solution. CareFinity allows your staff to view patient charts, schedules, images, documents, and more from any device, including mobile devices, even if the EHR is unavailable.

## Expert Healthcare Knowledge

We are healthcare and hosting experts. We understand the issues that you face each day in managing your EHR and supporting systems. Many hosting providers understand technology - but they aren't healthcare experts. We speak your language.
