

Smart Visit - Helps providers plan their day, shows info on all patients for the day and items that need to be completed. Work Smarter!

Smart Visit can help your clinicians work Smarter, not harder.

Smart Visit brings together information on all patients for the day in one simple template. From here providers can review summary information about the patient, drill down into details, and go to a patient's chart. It is perfect for pre-visit planning. In addition clinicians can see all the outstanding items that need to be addressed across all of their patients, like open orders, PAQ items, tasks, etc. And with one click they can go right where they need to so they can take whatever action is required. We're sure your providers will love the feeling of knowing everything is done at the end of the day!
