eMedApps™

Provider Productivity Analyzer for NextGen™ Ambulatory EHR

Everything you need to know about productivity at your fingertips!

How do you know if your providers' schedules are optimized for the most productivity?

Do you have an easy way to view productivity statistics by location, or specialty, or by individual providers?

Our Provider Productivity Analyzer will help you view performance statistics easily so you can take action where you need to.

The eMedApps Provider Productivity Analyzer looks at the appointment schedule data, interprets it and provides quantifiable data for leadership to review. Practices can run any of 3 reports to know the exact number of hours each resource is seeing patients, the volume of patient visits, and much more.

Location Report

eMedApps

Productivity Report By Location/Specialty/Resource
Reporting Period: 09/01/2017-09/30/2017

Main report showing daily detail as well as a practice summary of the schedule specifics.

The Provider Productivity Analyzer gives users the ability to analyze the NextGen appointment schedule; and generate detail and summary reports based on the following parameters:

- Resource/ Provider
- Location
- Specialty
- Events
- Category
- Cancellation Reasons

The reports show utilization of the providers and resources so that schedules can be optimized, unused time can be reduced, and productivity can be measured and acted upon in a timely manner. The reports track both the counts and the hours spent for each of following categories:

- Scheduled Appointments
- Kept Appointments
- No Show Appointments
- Cancelled Appointments
- Walk-in Appointments
- Patient Seen/Hour
