eMedApps™

EHR Data Conversion, Migration and Archiving

Our Care Connectivity Platform includes tools and services that provide several options to meet your data conversion needs and constraints.

Our Data Conversion Service

✳ We work with your team to determine which data needs to be extracted, converted or archived. Some examples include:
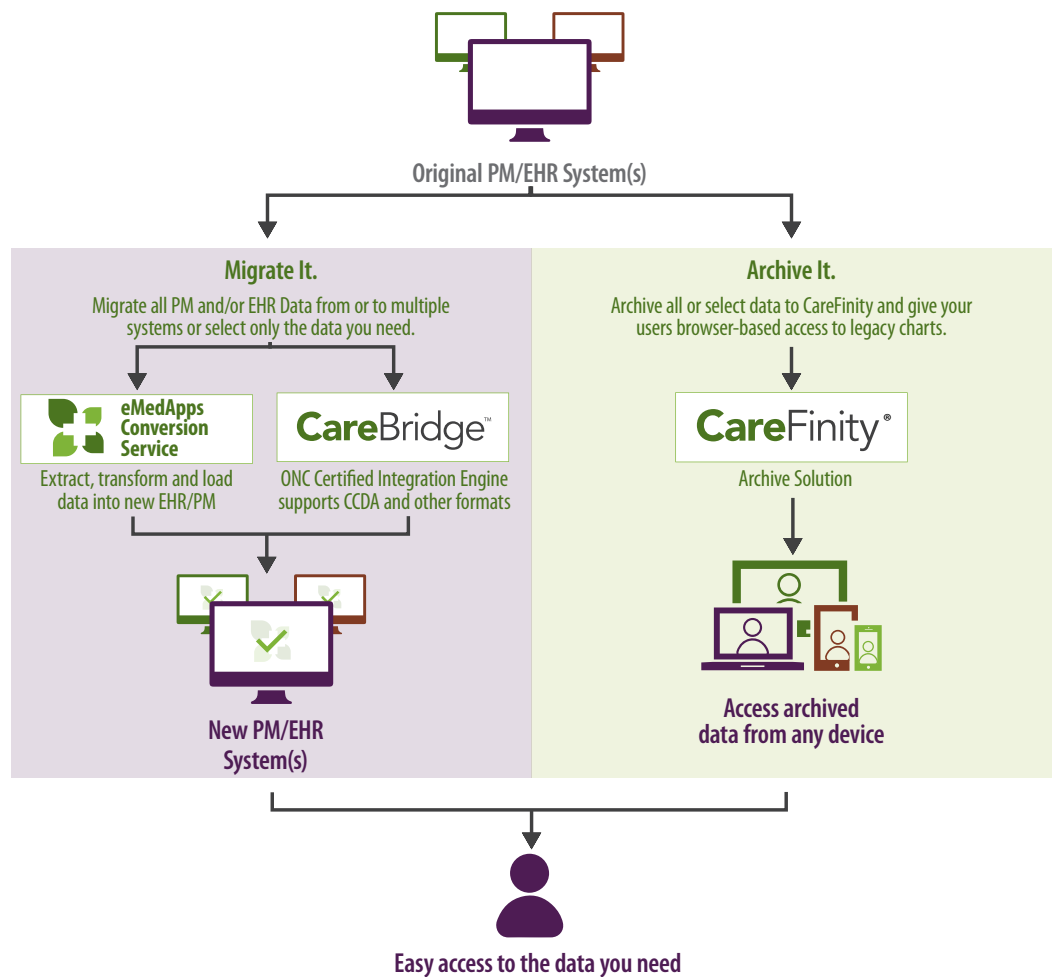

- Demographics
- Appointments
- Insurance
- Patient Balances
- Allergies
- Medications
- Problem List
- Histories
- Vitals
- Immunizations
- Lab Results
- Scanned Documents
- Visit Notes
- and more....

Original PM/EHR System(s)

Migrate It.
Migrate all PM and/or EHR Data from or to multiple systems or select only the data you need.

eMedApps Conversion Service
Extract, transform and load data into new EHR/PM

CareBridge™
ONC Certified Integration Engine supports CCDA and other formats

New PM/EHR System(s)

Archive It.
Archive all or select data to CareFinity and give your users browser-based access to legacy charts.

CareFinity®
Archive Solution

Access archived data from any device

Easy access to the data you need

✳ Our data conversion team can extract data from your old system/s, cleanse and convert that data to meet the requirements of the new system and populate the new EHR system with the data. We can convert both the PM and EHR data, just PM or EHR, or partial conversions taking only selected data from the old systems and converting into the new system. We can also convert from or to multiple systems.

✳ Our ONC certified Interface Engine can be used to receive data from source EHR systems in any format and reformat the data into messages that can be accepted by the destination EHR such as CCDA, and others.

✳ Our CareFinity solution can be used as an archive for EHR data from your old system allowing you to retire your old EHR, reduce software support costs and still have easy access to all your patient charts.
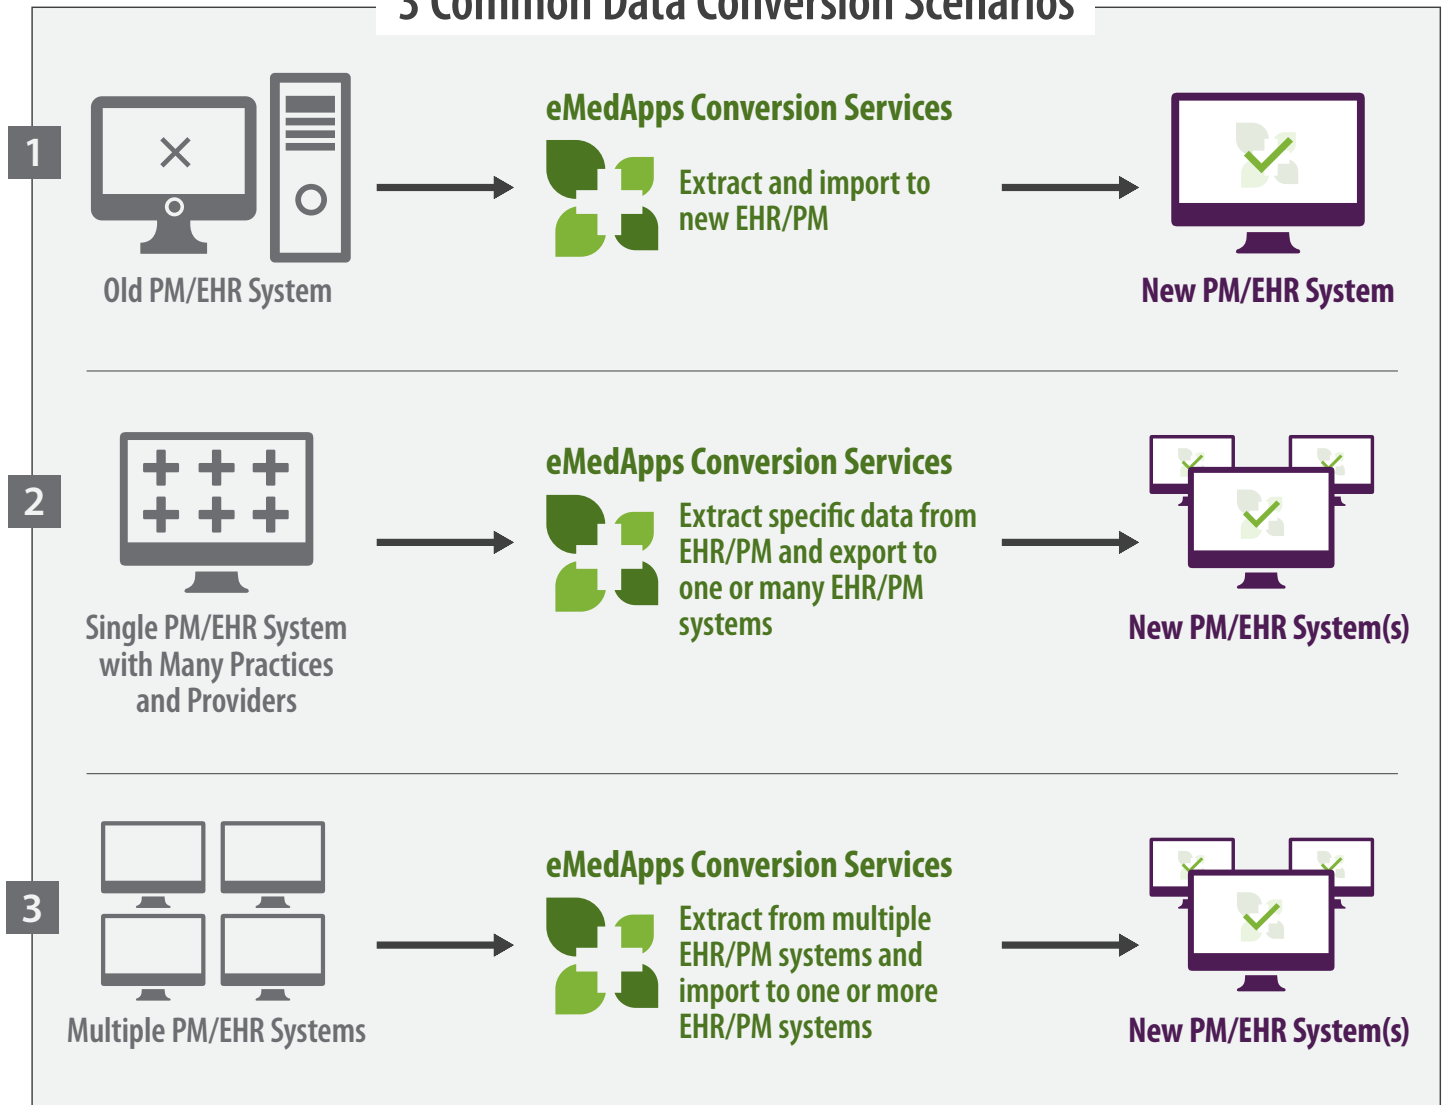

✳ We will be happy to work with you to determine the best options for your data conversion needs.

EHR conversions and data migrations are critical during mergers, acquisitions, and other transitions.

Moving from one EHR system to another can be a complex endeavor. We make it easy on your team and do the heavy lifting so your team can focus on your new system and delivering patient care.

3 Common Data Conversion Scenarios

1

Old PM/EHR System

eMedApps Conversion Services

Extract and import to new EHR/PM

New PM/EHR System

2

Single PM/EHR System with Many Practices and Providers

eMedApps Conversion Services

Extract specific data from EHR/PM and export to one or many EHR/PM systems

New PM/EHR System(s)

3

Multiple PM/EHR Systems

eMedApps Conversion Services

Extract from multiple EHR/PM systems and import to one or more EHR/PM systems

New PM/EHR System(s)

At eMedApps we understand the importance of data conversions. Our experience, knowledge of EHR's and technical expertise allows us to do things that others say are impossible. Other companies offer data conversion services that require you to do more work, to spend more money and to get less than desired results. We go the extra mile and make the process worry free for your team!
