

Appointment Link

Making Scheduling Easier for Your Patients

Connect with your patients in a new way with eMedApps' Appointment Link. Your patients can now easily make appointments using the technology already in their home.

Healthcare providers that offer the latest in technology stay one step ahead. Making it easier for patients to interact with their providers, helps keep patients happy and healthy.

This new offering gives you the ability to stand out from the crowd. You still control the types of appointments, locations and providers that you want to enable. You select and invite the patients you would like to have participate. Your patients can then utilize Appointment Link through their Amazon Echo.
