

CareBridge™ ONC Certified Interface Engine

Your Workflow, Your Rules

CareBridge integrates your EHR with all other health IT systems to create a truly interconnected network of patient data that is easily shared, managed, and accessed across healthcare enterprises and information systems.

- Message builder to map incoming and outgoing messages, build custom business logic, interact with data stores and web services
- Send and receive messages via Direct
- Resolve unmatched patients for inbound interfaces with integrated web based “holding tank”
- Resend, reprocess, or edit messages with the integrated log viewer
- Ensure efficient messages processing through centrally managed instances of the engine
- FHIR enable legacy applications
- Vendor neutral

“CareBridge is a powerful and flexible interface engine that can accommodate the growing needs of data interchange between our internal clinical information systems and our external business partners.”

San Kim, IT/IM Director, Asian Pacific Healthcare Ventures, Inc.
